November Had Lots To Be Thankful For

- The focus in November is thanks and this year we continue to have news to brighten that outlook.
- A jump in the annual GDP estimate could bring us to the healthiest overall gain in 11 years. With consumption up, inventories down and more capital spending, profits flew to the corporations. The stock market is riding high on the news.
- In the housing area, the weather has been holding us back but permits are up. House inventories are low which will help prices. Auto sales are also up with thoughts of lower gas prices.
- Employment claims are up with only CA showing a major increase. Five other state's claims increased due to weather.
- The Federal Reserve, which ended its quantitative easing in October, is standing firm in the face of the market volatility and remains accommodative. The Committee's stance does not mean it is ready to raise overnight rates but is willing to let the markets set real values once again.
- Although Europe still struggles with recession, the ECB is moving to solve problems through an injection of liquidity.

Black Gold: A Boon and a Bust for Economies

- On first blush, the major drop in oil prices seems like one of the things to be thankful for, but like most economic stories, there is a darker side to consider. OPEC refused to curtail production: a move that might have been aimed at US production. Intentional or not companies will now look to cut, slow or curtail production slowing US GDP.
- The US gets the best benefit because we are the biggest oil user. As consumers cheer the lower oil prices – hopefully they will spend those extra *petro* dollars on consumer items. Globally though - the fall in prices creates deepening cracks in global economies. In Europe lower prices contribute to weak inflation and potential deflation. Venezuela's social unrest could spiral out of hand.
- Companies in the Permian Basin and Canada could be big losers because of the price of production. This price could also drive Europe back to Russian oil/gas next year recreating the dependency Putin wants. Russian consumers have actually seen an uptick in prices with the fall of the ruble.
- Banks are also feeling the pinch with huge development loans outstanding. A wave of defaults has materialized, since oil producers represent about 15% of all junk stocks. Additional defaults will dry up liquidity in these markets.

Rates Hover at Continuing Low Rates

- The Federal Reserve officially ended their quantitative easing (QE) in October which created solid growth. It will keep investors in markets since liquidity rates are zero. This will drive the stock markets. The second result is that longer rates will begin to move as funds move to other markets.
- The FOMC's move to a more data dependent view of employment and inflation will keep the markets guessing for some time.
- With elections over another important variable has been removed which, absent more geo-political risk and oil fluctuations, should calm the markets somewhat and may raise longer rates.

End of Month Rates - Full Yield Curve - Fed Funds to 30yr

Various Pooled Funds

As of November 30, 2014

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The extremely low short-term rates make diversification difficult and they are reasonably expected to continue now at least through 2015. Longer term rates have moved lower and do not provide reward for extension risks.
- Banks remain *uninterested* in new deposits and although state and local bonds continue to add value they have been discovered and are declining in yields.
- Portfolios are cash heavy as we struggle to find value with a flat yield curve which provides little value under six months. Going too long has its risks if rates do rise quickly on news.
